Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 31 and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,451,030 to Li et al.

Li discloses a method comprising: inserting a tissue anchor (anchor 1) into tissue; substantially covering the tissue anchor during insertion of the tissue anchor into tissue (FIG. 2); and engaging an applicator with a member (13) to deflect the applicator (14) such that the applicator rotates the tissue anchor during deployment of the tissue anchor into tissue.

Allowable Subject Matter

3. Claims 1-16, 19-21, 23-30, 33-35 and 37 are allowed.

Art Unit: 3731

4. Claim 38 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose or suggest a flexor configured to engage the applicator and deflect the applicator to deploy the anchor.

Response to Arguments

6. Applicant's arguments with respect to claims 31 and 32 have been considered but are moot in view of the new ground(s) of rejection.

7. In arguments filed 15 July 2003, Applicant argues that Li 030 does not disclose a method in which a lateral force is applied to an applicator such that the applicator rotates a tissue anchor during deployment of the anchor. It is noted that these features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Applicant only claims "engaging an applicator with a member to deflect the applicator such that the applicator rotates the tissue anchor during deployment of the tissue anchor into tissue." No lateral force is applied to the applicator. Therefore the rejection over Li et al. '030 is proper.
